lotes: Engineering Drawings nese drawings shall be read in association with the engineering floor list and specifications as well as the engineering truss layout and becification.
DBC 9.10.19.3 - Smoke Alarms Renovations Only)
kisting smoke alarms are acceptable, however, if the scope of work volves renovating existing bedrooms, changing room uses from a non edroom use to proposed bedroom use or an addition which includes a edroom many requirements of 9.10.19.3 would apply including being terconnected, hardwired and with visual notification. IF a smoke alarm required it will be noted on drawings
DIMENSION NOTE: D19.12.05 - There are different ways of dimension architectural bors, what follows is an explanation of the why interior walls are mensioned as 4" or 6" vs other methods. bome Architectural drawings chose to dimension the rough wood stud aming. However this would create a lot fractioned mensions on the plans and would require the framer b account for the $\frac{1}{2}$ " drywall material in some conditions like bathroom
bs and stair wells. The Architectural drawings chose to dimension the finished wall mensions as well. These Architectural set of drawings chose to dimension interior walls to
round 4" or 6" dimension. We feel this is the cleanest dimension s they do not have fractions, and at most produce $\frac{1}{4}$ " error which isn't typically an issue. Further we all appreciate that we can not ask trades in the field to measure to
accuracies nor to we assume that as built construction could hold nose tolerances.
2019.11.27 - Manufactured Items and Materials
All materials like a truss, floor joist, beams, etc. CAN NOT e designed, put into production or purchased for installation based pon these drawings alone.
ALL dimensions need to be verified during construction and efore the material is purchased, ordered or put into production. The nanufacture, like the truss manufacturer, builder, contract or framer MUST
eview all relevant dimensions and inform Virtual Creations and the nanufacture of any discrepancies. At the minimum the client must at ast contact Virtual Creation to review the as build condition before urchasing, ordering or putting into production any and all materials.
FAILURE to verify these dimensions will absolve Virtual reations of any responsibility of errors or discrepancies in our plans. By paying this invoice you agree to this requirement and condition.
